Statistical Services

Statistical Analysis Services – Management, Economics, Finance & Engineering

Our analytical team brings in-depth knowledge and domain expertise across a broad spectrum of industries. Coming from a wide variety of academic and commercial backgrounds our statisticians and engineers frequently participate in rigorous training sessions to reinforce fundamental practices and explore cutting-edge methodologies. We deliver expert statistical analyses and programming across a range of industry sectors including Pharmaceutical, food and beverage industry, cosmetics and beauty, Sensory, Consumer Analysis, banking and financial services, utilities and energy, insurance, retail and consumer packaged goods, consulting and professional firms and travel and leisure. Our statisticians and programmers have built a reputation for excellence by being responsive and collaborative, producing quality deliverables, and maintaining the highest level of scientific integrity. Our solutions include big data analytics, marketing analytics, data services, digital analytics, HR analytics, operational analytics, analytics consulting and outcome based analytics. In

addition, we also offer solutions to marketers, business consultants, and academics for enhancing strategic decision making. We assist you in planning cost-effective survey, product portfolio analysis, differentiate between bad and good forecasts, strategy setting and mapping markets for positioning of products. In addition, our team of statisticians also offer 4D map, BCG Matrix, risk analyst, project map, profile manager, copy test, variation analyst, stacked charts, smart mapping, semantic differential, segmentation tree, proportion analyst, quality analysis, McKinsey Matrix, cluster analysis, decision, tree, descriptive analysts, forecast manager, gravity managers, brand switch analyst, brand mapping, and benchmark map. Other solutions offered are marketing research and statistics, queuing theory, project management, forecasting, database analysis, and pricing.

Statistics End-to-End Support from Tutors India

Statisticians are expertise in handling AMOS, regression, PLS, Bayesian methods, casual inference, hierarchical models, survival analysis,

longitudinal data analysis, HIV / AIDS, missing data analysis, receiver operating characteristics (ROC) curve analysis, stochastic modeling, statistical computing, & statistical genetics. We also help you calculate the sample size, design mock-up tables, figures, as part of the statistical analysis plan. We also perform statistical programs to validate tables, figures to the client through an independent review of programming code. Finally, our team prepares a statistical report according to the requirement. Our team comprised of research methodology and study design expertise, subject matter expertise and copy editors. Our research expertise has rich experience and has sound statistical knowledge including interpretation of statistical reports.

Statistics Features

Our Statistics Service structure features consists of the following

Our report will include the following insights (Note: these are only the insights not structure) Methods used, Missing data analysis, Normality and homogeneity, Basic and descriptive analysis Along with graphic visualization, Inferential analysis or hypothetical analysis, Summary and limitations

Statistical Programming Services

Statistical programming to create automatic tables and figures along with the validation. Further creating data entry format in excel, exporting data into SPSS or any software, labelling, checking for normality, missing data, data entry errors, outliers checking using appropriate analysis. Although there are several ways of analysing data, usual format starts with descriptive statistics (mean, standard deviation, minimum, maximum, range, standard error of the mean, confidence interval) of the socio-demographic variables (age, sex, occupation, income, marital status) and followed by the reliability of the composite scores. Further, the data analysis is focused on hypothesis testing using appropriate statistical tools.

Sample Size Calculation

We help you to calculate the sample size to determine the optimum number of participants to arrive at scientifically and ethically valid findings. Our team of statisticians helps you to generate sample size for all your clinical investigations.

Statistical Analysis Plan & Listing of Tables, Listings, and Graphs

At Tutors India, the presentation of statistical output for Statistical Data analysis follows the journal format and apply an appropriate interpretation. Further, mock-up tables, figures, as part of the statistical analysis plan are produced.

Statistical Report

At Tutors India, the presentation of statistical output for the Statistical Data analysis and Ph.D. thesis data analysis follows the journal format and apply appropriate interpretation not only based on numbers (quantitative expression) but also qualitatively including commenting your research methodology strength and Limitations.

Expertise

At Tutors India, our team of expertise handles high-quality data analysis, biostatistical computing & data management services. We apply statistics techniques to a wide range of clients in public health research and biomedical science including clinical trials, outcomes-based research, animal studies, and observational studies.

Statistical Report from Tutors India

At Tutors India, our statistical report writing team is equipped with subject matter expertise (e.g. Psychology, Education, business expertise), statistician (specific expertise, e.g., biostatistician, finance statistics), copy editors (who will edit the report according to the format required E.g., in APA statistical report writing, business statistical report writing or for statistics for Annual report, or White paper, or statistics for Manuscripts, or statistics for grant proposal, statistics for dissertation in Harvard or APA, or in any format as specified by the client.).
